In 3x3 V2_ offers three artists the space, time and resources to develop three experiments. Every first Friday evening of the month the public can witness one of these experiments live.

A unique experience, as with every experiment no one knows what the experiment will lead to. Jeroen van Loon is the second artist to create three new experiments in this series. He is fascinated by the (non-) impact of digital technology on our society. In his work he uses various ways of documenting and visualizing digital culture, both online and offline. The third and last of his experiments takes place on Friday 2 September.

Every year, V2_ invites a small group of up-and-coming artists to spend their summer at V2_Lab for an intense short-term residency. During these so-called Summer Sessions, the selected artists are given the opportunity to develop an artwork in close collaboration with V2_'s expert developers, curators and project managers. The results will be presented during Test_Lab: Summer Sessions 2016. In the Test_Lab tradition, the projects will be demonstrated live and the audience will be invited to 'test' the artworks hands-on. Featuring: Inari Wishiki, Jun Hyoung San, Lai I-Chen, Sebastian Pasquel, Siri Borge, Susana Sanches, Vida Guzmic, and Zane Cerpina. You will be able to see and experience the works on Friday 9 September – Kunstavond XL – as well: v2.nl/events/kunstavond-xl-1
